

PRODUCT SPOTLIGHT:

Hygienic Cold Water Basin

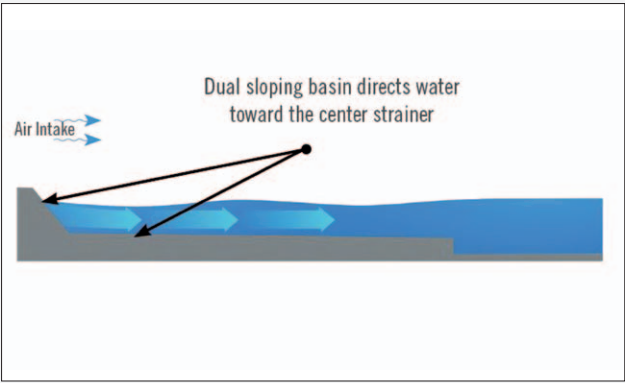

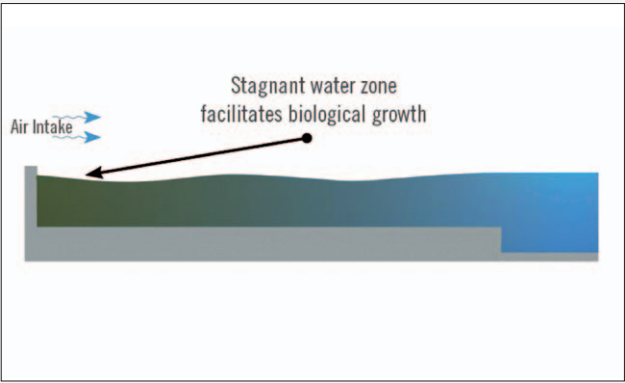

BAC's dual sloped hygienic cold water basin is specifically designed to keep the basin clean which reduces the operating cost by requiring less water treatment.

- ✓ Reduces the operating volume of water by 12%.
- ✓ Eliminates stagnant zones by directing debris towards the center strainer.
- ✓ Deters biological growth.

Paired with BAC's honeycomb Combined Inlet Shields (CIS), the water treatment requirements are further reduced from algae growth.

Compare the Advantages

BAC	VS.	Competitor
 <p>Dual sloping basin directs water toward the center strainer</p>		 <p>Stagnant water zone facilitates biological growth</p>
BAC Sloped Hygienic Cold Water Basin		Competitor's Straight Edge Cold Water Basin

**Use fewer chemicals and save on total operating costs.
